SUMMARY

Computer Science graduate with professional experience in IT Digitalization and Operations Analytics, specializing in data engineering, data analytics, business intelligence, and full-stack development. Experienced in developing end-to-end digital solutions, from data extraction, transformation, and integration to visualization, automation, and web application development.

PROFESSIONAL EXPERIENCE

PT Energi Sejahtera Mas (Sinarmas Cepsa) **Riau, Indonesia**
Operation Analytics – IT Digitalization **Oct 2025 – Present**

- Developed and maintained 5+ end-to-end data solutions, covering data extraction, preprocessing, transformation, integration, analysis, and visualization.
- Extracted and processed operational data from SAP using Python, then integrated transformed datasets into SQL Server and Microsoft Fabric Lakehouse for analytics and reporting.
- Built and maintained 5+ interactive Power BI dashboards to monitor operational performance and support data-driven decision-making.
- Developed a full-stack intranet web application to centralize company applications and improve accessibility across departments.
- Designed responsive web interfaces, wireframes, and prototypes to improve usability and visual consistency.
- Developed and managed 3+ business process automations using Microsoft Power Automate, reducing manual processes and improving workflow efficiency.
- Collaborated with supervisors, department heads, and business stakeholders to gather requirements, validate data, and continuously improve digital solutions.

KAI Bandara (PT Railink) **Medan, Indonesia**
Database Maintenance and Planning Intern **June 2024 – July 2024**

- Assisted in the maintenance and optimization of database systems.
- Monitored database performance and performed regular backups.
- Documented and entered database procedures and technical issues for future reference.

SELECTED PROJECTS

Repair Report Web Application
Full-Stack Web Development & Process Digitalization **Jul 2025 – Present**

- Developed a centralized web application integrating repair report forms, workflow processes, automation, and image/document submission into a single platform.
- Collaborated with Export Import users to simplify the existing multi-form and multi-platform reporting process based on operational requirements.
- Designed responsive UI/UX and streamlined end-to-end workflows to improve accessibility, efficiency, and process reliability.
- Developed as an enhancement to the existing Repair Report dashboard and automation solution; currently ~80% completed and in ongoing development toward production deployment.

Central Web Application
Frontend Developer **Apr 2026 – Present**

- Developed a central web application (specialized UI) to centralize company systems and improve user accessibility.
- Designed UI/UX, including wireframes, prototypes, and responsive web interfaces.
- Collaborated with the Digitalization Supervisor and Department Head through continuous review and enhancement cycles.

IT User Satisfaction Analytics & Dashboard Development
Data Engineer **Dec 2025 – Jan 2026**

- Automated survey data collection and integration using Microsoft Forms, SharePoint, and Power Automate.
- Developed an end-to-end data pipeline for real-time analytics reporting.
- Created interactive Power BI dashboards to monitor IT service performance and user satisfaction.

Safety Induction Automation & Dashboard Implementation
Data Analytics **Dec 2025 – Jan 2026**

- Automated safety induction data collection and approval workflows using Power Automate.
- Integrated multiple data sources into a centralized cloud database with scheduled refreshes.
- Developed analytics dashboards to monitor compliance and induction performance.

EDUCATION

Universitas Sumatera Utara **Medan, Indonesia**
Bachelor of Computer Science **August 2021 – March 2025**

- Majoring in Computer Science, GPA (3.83/4.00).
- Relevant Coursework: Data Mining, Database, Machine Learning, Artificial Intelligence.

Institut Teknologi Sepuluh Nopember **Surabaya, Indonesia**
Pertukaran Mahasiswa Merdeka Batch 2 – MBKM's Program **September 2022 – December 2022**

- Exchange Program at the Department of Computer Engineering.
- Coursework: Database, Data Structure, Front-End Web Development, Social Culture.

TECHNICAL SKILLS

- **Data Engineering & Analytics:** Data Pipeline, ETL/ELT, Data Cleaning, Data Transformation, Data Integration, Data Analysis
- **Business Intelligence:** Power BI, DAX, Power Query, Data Visualization
- **Data Platform & Database:** Microsoft Fabric, Fabric Lakehouse, SQL Server, SSMS
- **Programming:** Python, SQL, JavaScript
- **Automation:** Microsoft Power Automate
- **Web Development:** HTML, CSS, React, Vite, Responsive Web Development
- **UI/UX:** Wireframing, Prototyping, Interface Design
- **Soft Skills:** Analytical Thinking, Problem-Solving, Communication, Teamwork
- **Languages:** Indonesian (Native), English (Professional Working Proficiency).
